161.304: Computer Laboratory 10

Exercise 1: Easy, easy

We will not look at those during the Lab, but make sure you can answer the questions 9E1-9E7

Exercise 2: Silly prior

Do exercise 9M2.

Exercise 3: An introduction to the Cauchy distribution

Do exercise 9H1.

Exercise 4: Prior cascading effect

Do exercise 9H3

Exercise 5: YOUR Metropolis algorithm

If you feel confident, go for 9H6. Notice that you will have to figure out how to include data into your algorithm. I think it can be a rewarding experience to write your MCMC algorithm?! Even if you keep it to the peice of paper stage, a neat plan would be great. Only if you've got the time, I reckon this is a challenge!
